

air care and maintenance

care and maintenance of WOCA oil finished floors:

- Regularly vacuum or dust mop (Swiffer) your floor to prevent sand or abrasive dust buildup that can scratch the floor finish
- Wipe up spills and spots immediately with a damp cloth
- For regular and frequent cleaning, use WOCA Master Soap. The Master Soap is formulated to allow virtually daily cleaning without leaving behind residue, which may cause excessive buildup over time
- Use WOCA Oil refresher at least twice a year. This will introduce a small amount of the oil into the floor to freshen it and extend the time before re-oiling becomes necessary
- Do not use ammonia or oil-based wax, polish, household dust treatment chemicals, abrasive cleaners, furniture cleaners or any other non-WOCA brand product to clean your floor
- Do not wet mop the floor; a well wrung damp mop is sufficient. Excess moisture may cause damage to your wood floor
- Only WOCA products should be used to clean your floor, which can be purchased direct from WOCA

preventative maintenance:

- Place high-quality floor mats and area rugs near outside entrances to prevent dirt, sand and other unwanted substances from being tracked directly onto the flooring. Also, if you have wood flooring in your kitchen, a throw rug with a soft or felt backing should be placed in front of the sink area to catch spills and splashes.
- Attach felt floor protectors on moveable furniture, including chairs, tables, sofas, etc. that sit directly on the floor.
- Keep pet nails trimmed and filed in order to minimize excessive wear.

stains, spills, tough dirt, etc:

- Stains, spills, tough dirt may require using WOCA spot remover. For complete instructions on how to use the WOCA spot remover, see website for more details.

repairing scratches:

- Light scratches are best repaired by hand rubbing WOCA Master Oil or Master Color Oil or Maintenance Paste on the affected area using a cloth. If necessary, first clean the area to be repaired with WOCA Wood Cleaner solution. Be sure area is dry before applying oil. Leave the oil to absorb for a short period of time before thoroughly buffing and then removing the oil from surrounding area.

long-term care:

- Depending on wear, and your own preference, re-coating with a light coat of WOCA oil paste once a year or once every two years, depending on wear, is recommended to maintain protection. Although the paste can be applied by hand, we recommend that you contact your dealer for a professional referral as the professional can apply with a low speed buffer to the exact gloss level you prefer. Before applying the paste, the floor should be thoroughly cleaned with WOCA's wood cleaner (intensive cleaner)
