Environmentally friendly floors.

natural jatoba

air³

[âr] (n.):

1. a select group of thirteen species of engineered hardwood flooring manufactured in both 3 1/2" and 5" widths. 2. employs a patented locking system that simplifies installation. 3. floating installation is versatile and eliminates costs and environmental concerns associated with adhesives.

natural sapele

dimensions

- thickness: 1/2"
- face width: 3.5" or 5" as noted per style
- lengths: random up to 4'
- square feet per carton: 18.75 sq. ft. for 3.5" / 19.53 sq. ft. for 5"

construction

- 2 mm hardwood wear layer over poplar core
- 9 layer construction
- core board constructed in cross-ply layers to ensure superior dimensional stability
- hardwood balance board creates maximum structural support and prevents distortion

finish

- satin or hand scraped finish option as noted per style
- nine layers of unique coating -- includes aluminum oxide crystal coating for superior durability
- finish technology provides optimum performance in abrasion and flame resistance

installation

- float or glue down

warranties

- lifetime residential warranty against structural defects
- 25-year residential / 5-year light commercial finish wear-through warranty

environmental attributes

- floating installation eliminates jobsite adhesives
- core board constructed with poplar wood -- a highly renewable resource due to its fast growing properties and abundance in many parts of the world
